

Tolgahan ÜLKER

Full-Stack Software Developer

EXPERIENCE

Front End Software Developer

Wask Inc.

Aug 2024 - Present , İstanbul

I work as a frontend developer at Wask.co, where I focus on creating modern web interfaces with a strong emphasis on user experience. On this platform, you can find insights into my professional expertise and approach to web development.

Full Stack Software Developer

Hakmar Gıda

Jun 2022 - Aug 2024 - 2 years, İstanbul

I created a project that combines software with industrial control, allowing the electrical status and control of existing stores to be monitored and managed through mobile and web platforms. In this project, I took on roles in ERP software development, database management, and inter-company integrations. I was involved in integration and transition phases of the project.

Electrical Technician

Arçelik

Nov 2020 - Jun 2022 - 2 years, İstanbul

In this company, I developed myself in industrial maintenance control and systems. I gained valuable experience by applying my previous knowledge of PLC programming and industrial operations.
